

Location 123 Auburn Street Time Start 1:00pm Time Finish 1:15pm

At your location, stand with your back against the wall and face out towards the street.

Using a tally count, record how many people pass your line of sight on your side of the street during the observation period.

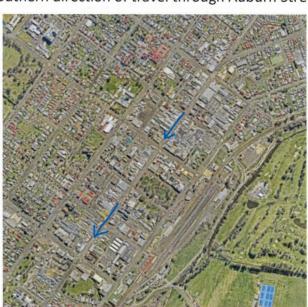

Note: Group tally in lots of five. Place a full set of five in each designated box.

What to record:

- Keep a separate tally for people travelling in a northern and southern direction. People walking towards
 the north are recorded in the northern table, people walking towards the south are recorded in the
 southern table.
- Record any person that passes your line of sight. This includes children, people on mobility scooters, bikes, scooters, or skateboard riders on the footpath.
- Even if the same person crosses your line of sight multiple times, record this as a new person each time.
